## INTRODUCTION

Smoke NV is the hottest and newest smoking device. It emits a vapor that simulates smoking by satisfying the physical habit cravings and urges.

Smoke NV is a non-flammable electronic atomizing device, utilizing advanced microelectronic technology and physical atomized technology to atomize in a disposable cartridge.

Smoke NV offers smokers the option to satisfy their desire in a safer way.

## COMPONENTS

## CHARACTERISTICS OF SMOKE NV

No ignition, no fire hazard. Free of tar and other carcinogenic substances.

No environment pollution. The exhaled smoke is vapor generated during the atomization of an alkaloid liquid, thus no effect of the second-hand smoke. The electromagnetic wave is shielded so as to avoid electromagnetic radiation.

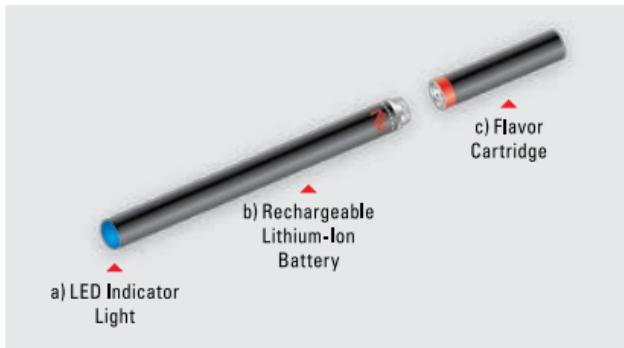

## WHY SMOKE NV VAPORIZERS ARE BETTER

- ▶ No tar or other carcinogenic substances.
- ▶ No ignition required, thus eliminating the over 4,000 chemical substances, including carbon monoxide, produced by an ordinary cigarette.
- ▶ Harmless to others and the environment; there is no second-hand smoke.
- ▶ Non-flammable. Our device is a non-burning electronic vaporizer, and its efficacy is similar to ordinary cigarettes - smokers have a sense of relaxation to alleviate the withdrawal syndrome.

## STRUCTURE OF THE SMOKE NV VAPORIZER

### Structure of the body

The body is an integral structure consisting of a stainless steel shell, lithium-ion battery, micro-electronic circuitry, high-sensitivity sensor, and an operating mode indicator light (a) at the tip of the Smoke NV device.

### Rechargeable Lithium-Ion Battery

Smoke NV uses high-performance lithium-ion batteries (b) controlled by an exclusive microchip with specialized sensors. Smoke NV Vaporizer works with the included battery charger; other chargers cannot be used.

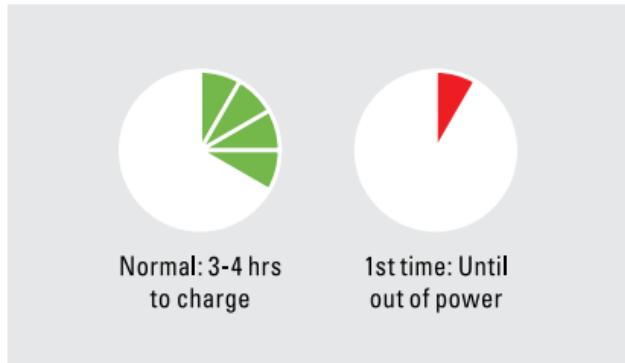

### Flavor Cartridge

The cartridge (c) functions as an inhaler, atomization chamber and a liquid container. There is diluted liquid in the container ready for atomization. The cartridge lasts approximately between 250-300 puffs depending on inhalation and consumption. Change cartridge when flavor lessens, vapor decreases, and metallic taste appears. Dispose of cartridge and replace with new.

## HOW TO CHARGE THE SMOKE NV VAPORIZER

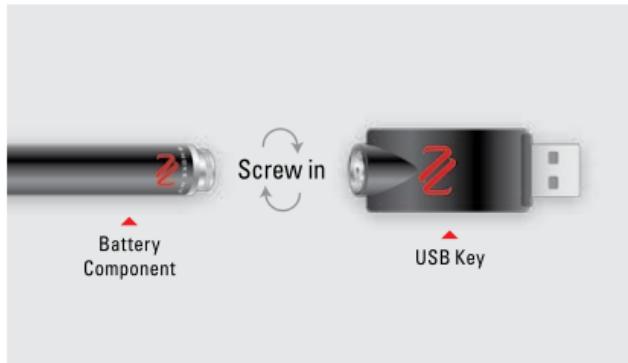

### Please Note:

For first time use, please use the Smoke NV device, until the battery is out of power. If the battery is out of power, the tip of the battery will continuously flash multiple times. Replace the depleted battery with a fully charged battery.

### Charge via USB Connector:

Unscrew the battery from the cartridge and screw the battery into the USB key. Attach the USB key to standard computers USB Connector. Once connected, the tip of the battery will flash few times, and the tip of the battery will remain a solid blue, indicating that the battery is being charged. Once the blue tip light turns off, this will indicate the battery is fully charged.

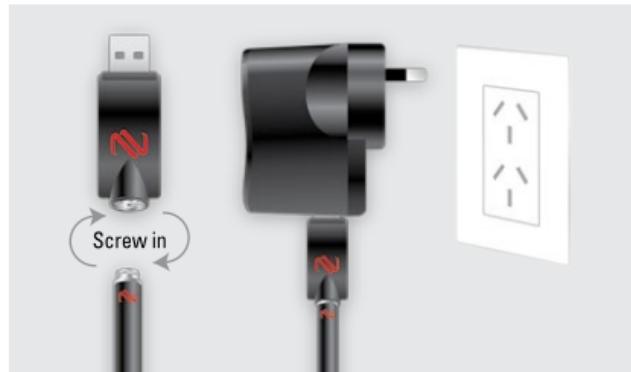

### Charge via Wall Adapter:

Unscrew the battery from the cartridge and screw the battery into the USB key. Attach the USB key to the Wall Adapter and into a standard wall outlet.

Once connected, the tip of the battery will flash a few times and the tip of the battery will remain a solid blue, indicating that the battery is being charged.

Once the blue tip light turns off, this will indicate the battery is fully charged.

## HOW TO SETUP THE SMOKE NV VAPORIZER

### Step 1:

Open the cartridge package and take out the cartridge.

### Step 2:

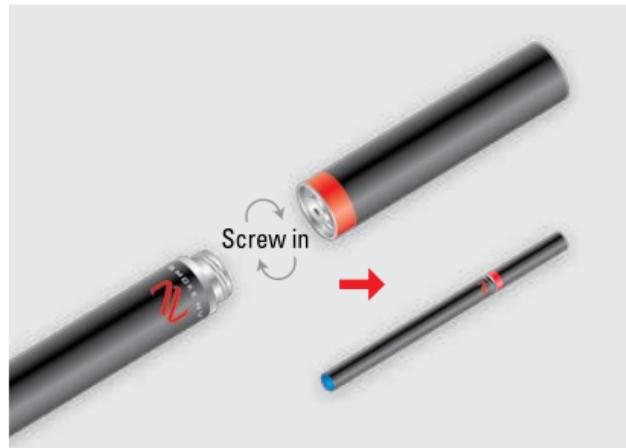

Unpack the cartridge and remove both rubber casing from each end.

### Step 3:

For each use the atomizer requires to be warmed up by inhaling on vaporizer with a longer puffing stride. The longer the puffing stride will allow the unit to produce more vapor.

## HOW TO USE THE SMOKE NV VAPORIZER

When you inhale, the indicator light at the tip will light up simultaneously. Ceasing inhalation will terminate the atomization, and the operating mode will return to a standby state.

## NOTICES FOR THE SMOKE NV VAPORIZER

- 1) Smoke NV and its accessories should not be used by children. The accessories may be swallowed by kids and cause damage. Please store the units properly and keep out of children's reach.
- 2) If the battery electrodes contact the metal ornaments, keys and so on, it may cause some loss and damage due to short circuit.
- 3) When you use your Smoke NV it is better to smoke less frequently than that of an ordinary cigarette.

4) Smoke NV is a high tech electronic product, and the accessories such as cartridges, batteries, chargers are the special accessories provided by our company only. If using other accessories that are not specifically provided, it may cause damage.

5) Caution: keep away from water, fire and unnecessary collisions. If you do not use the Smoke NV for a long period of time, please preserve the Smoke NV and its accessories in a dry environment at a low temperature.

## NOTICES FOR SMOKE NV ACCESSORIES

### Flavor Cartridge

- 1) The flavor cartridge is a disposable product. Do not reuse it. Please dispose of it properly after use, and keep it out of children's reach.
- 2) The flavor cartridge is a special accessory and must be used with the Smoke NV only.
- 3) Liquid in the cartridge is manufactured strictly in the correct proportion; mixing with other liquids is forbidden.
- 4) Preserving in a dry environment at a low temperature can keep the cartridge for 18 months.

### Rechargeable Lithium-Ion Battery

- 1) If any liquid from the battery comes in contact with your eyes, wash immediately with clean water and seek medical assistance.
- 2) If the battery smells, burns, changes color or deforms in any way during charging or use, cut the power supply and remove the battery from the charger and/or device. Discontinue use.
- 3) Do not attempt to modify or damage the battery by piercing or opening the battery with any tool.

### Charger

- 1) During charging, unit should stay away from high-temperature and/or wet environments.
- 2) Do not overcharge. Once the battery is fully charged, unplug the charger to avoid damaging the device.

## SUITABLE/UNSUITABLE USERS

### Suitable User:

- ▶ People who are determined to smoke in a healthier way.
- ▶ People working in non-smoking areas, but with the habit of smoking.
- ▶ People with a long smoking history and suffering from discomfort.

### Unsuitable User:

- ▶ Pregnant or breast-feeding women.
- ▶ People under the legal age.
- ▶ People without the habit of smoking.

## INGREDIENTS

- ▶ **ALL INGREDIENTS ARE FOOD GRADE.**
- ▶ Ingredients: Vegetable Glycerin, Water & Artificial Flavorings.

## SMOKE NV GUARANTEE

Smoke NV stands behind the quality of our product and guarantees to the original purchaser that our product shall be free from defects in material or workmanship for a period of 180 days (6 months) from the original purchase date. This warranty applies to the product under normal use and is subject to all product usage documentation. In the event you need to exchange your Smoke NV battery, or chargers, simply complete the Return Merchandise Authorization (RMA), place the RMA form and a copy of your receipt as well as the item(s) to be exchanged in a padded envelope, and mail it to us. Please allow 1-2 weeks for processing.

- ▶ Email: [warranty@smokenv.com.au](mailto:warranty@smokenv.com.au)
- ▶ Tel: 0295 201 821

## PLEASE NOTE:

- ▶ All cartridge sales are final.
- ▶ Cartridges are unable to be exchanged.

## HOW TO CLEAN THE BATTERY

Cleaning and routine maintenance of your Smoke NV Battery is required to maintain its life and ensure optimum performance. The metal surface of the Smoke NV battery accumulates dirt and residues. It is therefore important to clean it regularly to avoid poor connection between the battery and the cartridge. If you find that your Smoke NV battery is not working properly, and there is little or no vapor being produced, please complete the following steps.

- ▶ You'll need a tissue and a safety pin.

### Step 1

Unscrew the battery from the cartridge.

### Step 2

Use a tissue to clean the outside top of the battery, take the tissue and rub it along the outside metal surfaces. If possible try and clean the inside of the threads. Once finished, you should see dirt and dark residue on the tissue.

### Step 3

Next use a safety pin or toothbrush to do the following: There are two tiny holes on each side of the top of the battery take the safety pin/tooth brush and take the dirt or residue out of those little holes. Take the safety pin/tooth brush and run it along the threads of the battery inside or outside of the metal surfaces. Do not place the safety pin in the middle of the hole of the battery, it can ruin the battery. If you clean the safety pin or look at the toothbrush you will see dirt or black residue.

After cleaning, you will find your Smoke NV battery is working a lot better.
